

CTApp: Teaching Students Computational Thinking Through a Mobile Application

no. 2020-1-PL01-KA201-081924

CTApp project – Report of the Multiplier event

The multiplier event of the CTApp “*Teaching Students Computational Thinking Through a Mobile Application*” project was held at the 3rd primary school of Ipsonas on 22nd of June 2023. In total, 20 teachers participated in the event that focused on introducing the project and highlighting the key achievements. During the event, the participating had the opportunity to be introduced to the application, familiarise themselves with the learning environment, and reflect on its use in the teaching practice. In addition, they discussed potential challenges, strengths, and best practices of the use of the application.
